

TO: ALL MALITIAS AND MALITIA UNITS
FROM: GENERAL ART BEAN, THEATRE COMMAND

A couple of weeks ago we obtained information of different states going to a high state of readiness to combat civil unrest. This was generated by the National Security Agency. So I issued a high yellow status to all the militia units. We did not give specifics for this issuing. We even received some criticism from people in command status. But since there intelligence sources is so very limited we did not respond. We are going to issue the reason at this time why the National Security Agency was under such an alert, for retaliation on April 19, 1996. Those commanders with such limited intelligence sources now might limit there criticism. Within an hour and a half we had this fax verified as being bogus from the time we received it. But because of the reaction of the law enforcement agencies we could not lax our alert status until now.

General Art Bean

Lt. General David E. Rydel, Executive Officer

Lt. General Jim Muska, Chief of Staff

Item 13, 3/28/96
From The Constitutional Militias of the United States
To All Commands
Subject Project (Worst Nightmare)

1. The use of U.S. Military forces against American citizens is in direct violation of the Pos'se Comitatus Act. If such use takes place a response by the Constitutional Militia across the country is to be expected.

2. Information considered reliable by Constitutional Militia Intelligence Counter Intelligence Command indicates that the federal intentions are to force a situation like Jordan Montana to an all out confrontation shortly. I.C.I. command warns that the situation is fluid and can change at any time. Hopefully saner heads will prevail on both sides and the armed forces will not be used. There is a growing possibility that direct action by federal forces against the leadership of the constitutional militias might also come about. Such action must be viewed as a similar act of war as the use of military troops.

3. In the event that the military is used or militia leaders are assaulted all commands must be prepared to act. Begin drawing plans to shut federal operations down. Once action begins a red order will be issued and all commands should begin independent gorilla actions against selected targets. We must avoid civilian casualties at all costs. Our mission is to shut down federal capabilities, disrupt federal communications and detain key federal leaders for trial.

4. Indiscriminate acts of violence against any one or any thing will not be tolerated by any militia unit, officer or individual. Charges will be brought against those that violate this order.

5. All commands need to keep a tight rein on their troops and be very selective when choosing targets. If you are not sure and want consultation try to communicate with your immediate superior or ask the advice of the command officers collectively.

6. Communications between commands will probably break down shortly after any action begins and any communications in the mean time should be coded or limited. In the event that it becomes necessary to order a general action the code word will be (Contract) a cease fire order will be given under the code (Impass)

7. The following is a suggested list of targets of opportunity that all commands may want to consider in their area. Remember our intent is to limit their communications and capabilities as much as possible. We also must cost them as much time, money and physical resources as we can:

1. Federal satellite up links
2. Military fuel depose
3. Law Enforcement communications centers
4. Troop equipping and staging areas
5. Federal telecommunications centers
6. Military and law enforcement storage facilities
7. Military and law enforcement air craft on the ground

Page 2 Item 8

8. I.R.S. records storage facilities
9. Senior federal law enforcement officials
10. Federal reserve governors
11. U.S. military officers that are following illegal orders to attack american citizens
12. Federal, state and local officials that are acting outside their constitutional authority
13. Secure or destroy media installations that are not providing the people with what is really going on. C.N.N., A.B.C. News, C.B.S. News, N.B.C. News, selected news media
14. Military railroad line switch points
15. Secure food storage locations
16. Secure or destroy military arms and ammo dumps.
17. Destroy any foreign troops attempting to or intending to act in consort with the federal forces. Be sure that their intentions are clear
18. Detain any ranking officers for questioning and trial.
19. Sweep all civilian gun stores and confiscate all weapons. Be sure to leave a receipt for what you take under military necessity for future payment. The purpose behind this action is to safeguard the publics access to weapons redistribute these weapons to the public.
20. Confiscate military equipment wherever possible, if not possible destroy or make inoperative.
21. Move to protect loyal federal, state and local officials we will need them when it is all over.
22. Seize jail facilities for prisoners. Keep prisoners under guard and let no one out that is incarcerated for legitimate reasons. Keep as may of the staff in place as possible but watch them and don't let them keep their arms. Suggest you keep these facilities in lock down mode.
23. Secure public water, sewer and power facilities against action designed to disrupt the civil population. Also consider other important structures such as telecommunications switching centers or anything that will disrupt the population. Remember we must protect the people at all costs
24. Move to protect outspoken members of the patriot community (you know who we mean) so they can't be used by the feds.
25. Act against any one attempting to use the situation for their own gain or profit.
26. These are just a few ideas, there are many other targets of opportunity and things that must be protected at all cost. Remember the enemy will seek out ways of turning the civil population against us and we must anticipate their possible actions when and where ever possible.
27. This should be considered a war warning. If action takes place and you are unable to reach command wait 24 hours and commence offensive operations.
28. To clarify this item it must be clearly stated that this is designed to be a fail safe program. In the event that

Page 3 Con't. Item 28

the militia leadership is assaulted or rendered incommunicado. Individual constitutional militias will be on their own to follow this item as a recommendation. If the enemy knows that such a plan exists they will be hard pressed to justify an individual or collective action against militia leaders, since it would bring about the implementation of this item. In a similar vein the federals must come to understand that using military force will be the trigger that forces this hammer to fall. We must make every effort to avoid open conflict at all costs, but let us be clear if the federals step across this line the Constitutional Militia have no choice. Our goal will be to bring about lawful constitutional prosecution of those that have violated constitutional law or the oaths of office. We must do this as quickly, safely and orderly as possible. Be sure about your actions and their actions before implementing this item.

Agreed by C.M.F. Command.
